Drop testers allow us to know how vertical and rotational impacts can affect the integrity of the packaging and the products. The information obtained by the innDrop family will help to design a suitable packing to protect the goods during the distribution cycle.

**DROP TESTS SUPPORTED**

- **EN 15552**
  Complete, filled transport packages and unit loads. Performance testing schedules for common distribution chains.

- **ASTM D4169**
  Standard practice for performance testing of shipping containers and systems.

- **ASTM D7386**
  Standard practice for performance testing of packages for single parcel delivery system.

- **ISTA Procedures**
  1A, B, C, D, G, H; 2A, B, C; 3A, B, F; K; 4 Series; 6-FEDEX; 6-SAMSCLUB, 6-AMAZON.COM.
Technical specifications:

> 2 different designs depending packaging size.
> Drop height up to 2 m.
> Maximum load up 1200 kg / 2640 lb.
> Steel impact surface.
> Hydraulic dumpers.
> Possibility of control the drop orientation.
> Intuitive touch screen controller.

Optional:

> Foundation kit to reduce the minimum height.
> Hazards.
> innVision SET: high-speed camera and software that measures the unit load deformation, generating a report.
